**EDMUND A. LIPSKIS,
D.D.S., M.S.**

Upon graduation, Dr. Lipskis was asked to join the Faculty at Loyola University, School of Dentistry, where he remained on the faculty till 1993. While there, he was an Associate Clinical Professor and also lectured to both dental students and graduate specialty program dentists on Space Maintenance, Early Treatment Orthodontics/ Dentofacial Orthopedics, Orthodontic Treatment Mechanics and Airways. At Loyola, Dr. Lipskis directed orthodontic and dentofacial orthopedic treatment for patients treated through the Dental Pediatric Department. He has been in private practice in St. Charles, IL from 1981 through the present, with an emphasis on Orthodontics, Dentofacial Orthopedics, TMD, and Sleep Disordered Breathing. Based on his patient experiences, he embarked upon a 30-year journey and over 3,500 hours of post graduate

continuing education in the areas of facial development, orthodontics, facial orthopedics, craniofacial pain, and sleep medicine. He has studied extensively with many of the leaders in orthodontics, TMD, and Sleep, including Dr. John Witzig, Dr. Dwight Damon, Dr. Derek Mahony, and Dr. Steven Olmos. Dr. Lipskis was a member of the inaugural class of the AACFP's Institute. Dr. Lipskis lectures regularly on various orthodontic topics, especially the relationship between TMD, Sleep Disordered Breathing, and Orthodontics, and is now on the Faculty of the AACFP Institute.

Dr. Lipskis has been invited to lecture internationally with Dr. Derek Mahony, Dr. Steven Olmos, for the AACFP and other groups. He also presents a series of courses on Phase II TMD therapies using orthodontics to stabilize rehabilitated chronic pain and/or Sleep Disordered Breathing patients. Dr. Lipskis is a Fellow of the American Academy of Craniofacial Pain (AACFP), International Association for Orthodontics (IAO) and American Academy of Functional Orthodontics (AAFO). He is also a Diplomate of the American Board of Craniofacial Pain (ABCP) and American Board of Craniofacial Dental Sleep Medicine. He has published articles in Australasian Dental Practice on bite registration and OSA; July and September, 2012

He currently serves on the Board of Directors for the ABCP and the AACFP.

A THREE DAY COMPREHENSIVE COURSE IN ORTHODONTIC CASE FINISHING, AS RELATED TO TMD AND DENTAL SLEEP MEDICINE.

DAY 1:

- Determining when Orthodontic therapy is necessary
- Review of records requirements for comprehensive diagnosis
- The concept of functional orthodontics
- Biomechanics of tooth movement and bone growth
- Differences between passive ligation and traditional orthodontic treatment
- Dental Sleep Medicine/ airway considerations
- Treatment planning to address craniofacial asymmetries, airway inadequacies and TMD related issues

DAY 2:

- Palatal expansion to improve nasal airways and improve oral volume to allow for normal tongue posture and function, even in adults
- Lateral arch development in the lower jaw at any age
- Class 2 treatment planning
- Class 3 treatment planning
- TADs and mechanical advantages for anchorage and skeletal changes
- Adjunctive therapies

DAY 3:

- Smile aesthetics
- Case finishing
- Stability and retention
- Making it all work
- Practical practice hints for integrating this into your practice
