7-8, 2019**

**EODO, 85 Bourke Road,  
Alexandria, NSW**

**16 CPD points**

## **Evaluating and Treating TMD**

Do you have patients suffering from TMD symptoms? Jaw pain, neck pain, teeth grinding, headaches, facial pain and muscle problems? Are they struggling with everyday life trying to manage their pain? Does it affect their quality of life? How do you evaluate patients to see if you can help? Then how do you treat them?

## How can you use DTR in your clinic?

Patients who benefit from DTR with symptom relief are patients with headaches, migraines, Trigeminal Neuralgia, Meniere's Disease, Cervical Dystonia, Phantom Bite. DTR is a TMD therapy that does not depend on patient compliance for it to work. Beyond this the concepts for DTR will benefit all of your implant, cosmetic, removable, orthodontic, and full mouth cases all the way to simple fillings and new patient screenings. DTR principles go beyond TMD cases.

### Who is Dr Ben Sutter?

*Dr. Sutter of Eugene, Oregon, uses cutting-edge technology to diagnose and treat problems related to jaw alignment. He is an expert in neuromuscular dentistry, TMJ therapy and treatment for Chronic Headaches, Migraines, TMJ Dysfunction and Whiplash. He is a world leader in DTR and will share his knowledge and expertise in this seminar. Dr. Sutter's main goal is relieving pain and providing restored overall health through balanced, functional oral health—a goal he accomplishes through his gentle touch and caring demeanour.*

### Course Objectives

- ✓ Learn principles and practice of Disclusion Time Reduction.
- ✓ Evaluate and diagnose clinical DTR cases.
- ✓ Gain skills interpreting data with hands-on clinical demonstrations for occlusal analysis.
- ✓ Watch demonstrations using live patient treatment scenarios.
- ✓ Assess when to, and when not to, treat patients with DTR.
- ✓ Formulate how DTR can be applied to other areas of dentistry.

### What will I learn in this course?

- ① **Technology:** The latest technology-based approach to treat TMJ problems in your office. Learn how to use T-scan and EMG to measure and transform problems.
- ② **Minimally invasive:** Technique makes adjustments while patient is in the office –often in one appointment. DTR is a TMD therapy that does not depend on patient compliance for it to work.
- ③ **Method:** A step by step approach that shows you how to clinically evaluate patients' problems.
- ④ **Fast:** How to treat patients with an in-office, non-appliance option that deliver results in a short time.
- ⑤ **Proven:** DTR is the only occlusal therapy proven to improve human mastication!
- ⑥ **Demonstrations:** Clinical demonstrations, live patient demonstrations and practical sessions.
- ⑦ **Quantitative:** Take the guesswork out of pain using an occlusal force mapping system so you can accurately pinpoint the cause of the pain. Without TScan you are 12-13% accurate with shimstock wax or accufilm.
- ⑧ **Guarantee:** Learn a proven technique and learn how to interpret the data in 2 days. You will be able to implement this technique in your practice immediately. Your patients will love you for it. They will recommend you.

### Program Details

**When:** September 7-8, 2019

**Where:** EODO, 85 Bourke Road, Alexandria, NSW

**CPD:** 16 CPD points

**Cost** Doctor: \$2095 (ex GST)  
Staff: \$500 (ex GST)

**Bonus:** If 1 doctor and 1 staff attend bring additional staff for no charge.
